

Magic Submitter how to get started

Magic Submitter 7 basic steps

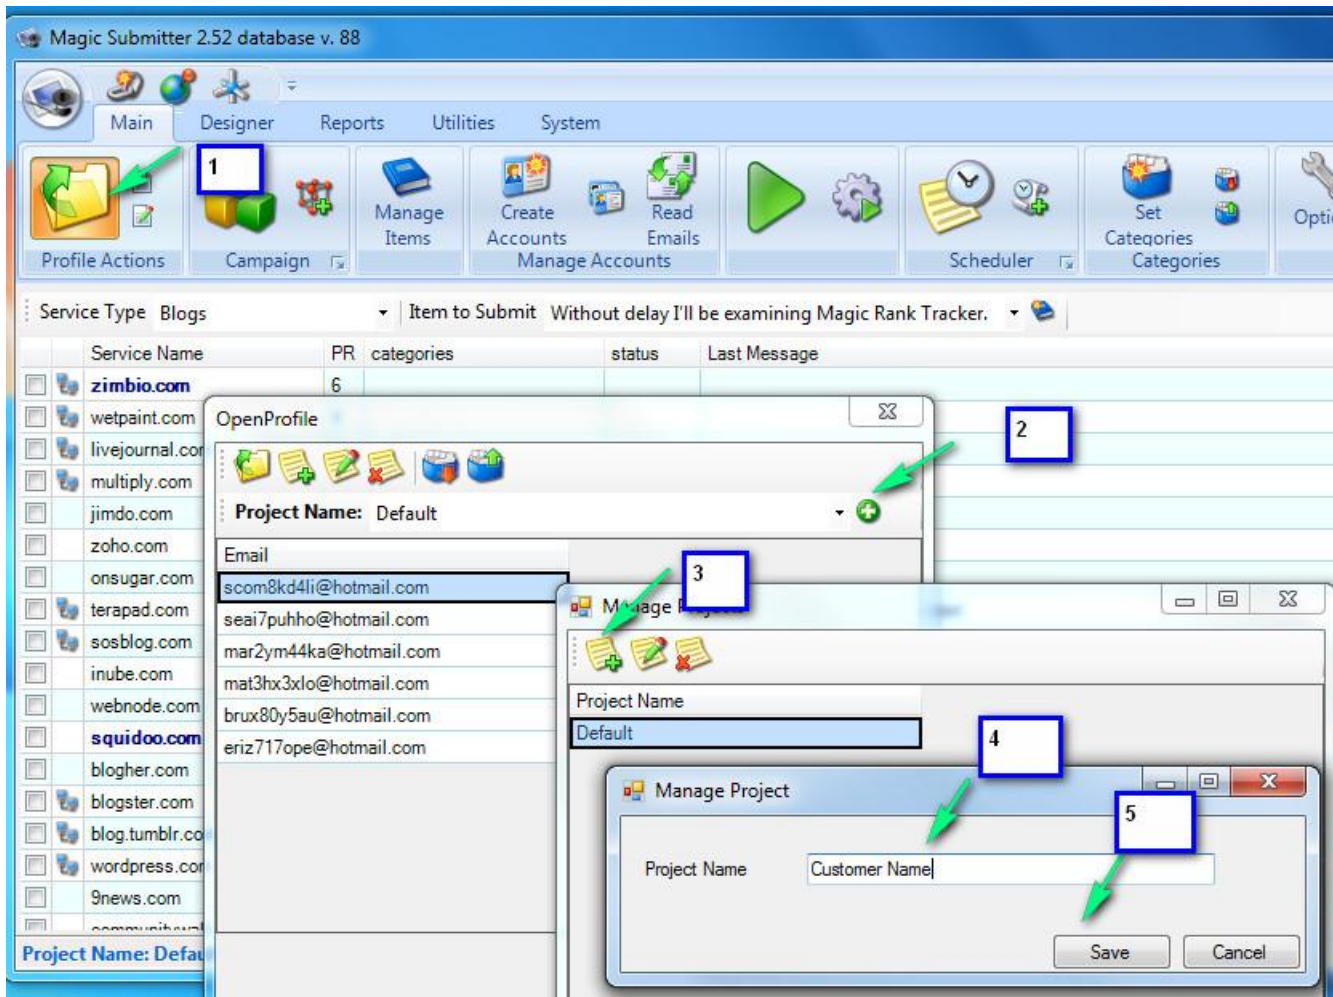

Magic Submitter Software Architecture

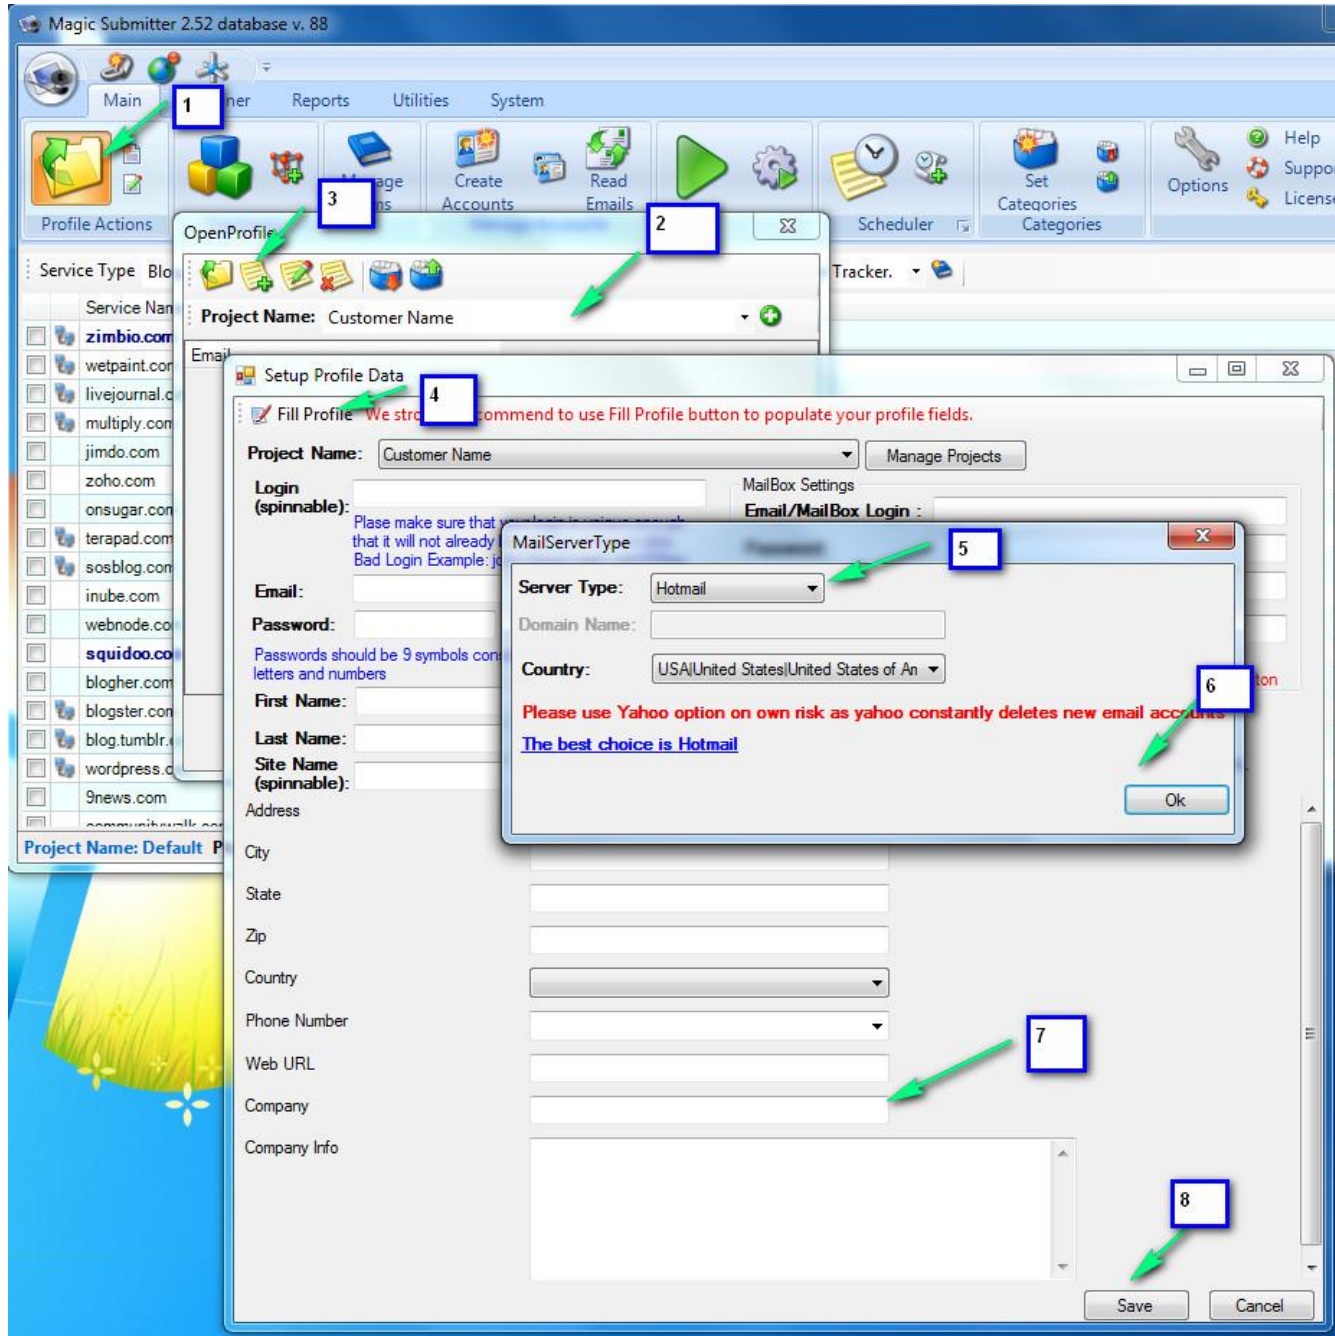

1. Create Project

create one project for each of your customer or site you are going to promote

2. Create Profile

create 3-5 profiles for each project use download pre-created or Hotmail as option

3. Create E-mail Account for each profile

The screenshot shows the 'Setup Profile Data' window with various fields for profile information. A 'Magic Submitter' dialog box is overlaid, asking if the user wants to automatically create a hotmail.com mail account. The dialog has 'OK' and 'Cancel' buttons. A green arrow points to the 'OK' button, and a blue box with the number '2' is next to it. Another green arrow points to the 'Save' button in the main window, and a blue box with the number '1' is next to it.

Setup Profile Data

Fill Profile We strongly recommend to use Fill Profile button to populate your profile fields.

Project Name: Customer Name **Manage Projects**

Login (spinnable): 2nd9xm10mc
Please make sure that your login is unique enough that it will not already be used by someone else.
Bad Login Example: john Good Login: joht265leg

Email: 2nd9xm10mc@hotmail.com

Password: z2F9426zW
Passwords should be 9 symbols consisting of lower and upper case letters and numbers

First Name: 2nd LT James

Last Name: McCoy

Site Name (spinnable): 2nd9xm10mc

MailBox Settings

Email/MailBox Login : 2nd9xm10mc@hotmail.com

Password: z2F9426zW

POP Server Address: pop3.live.com

POP Server Port: 995

Test Connection Please ensure that you have created account in mail service before you click Test Connection button

Site Name: Some sites such as blogspot.com will use this name in the URL for your content. i.e. If your site name were "CoolCats" your blogspot URL would be "http://coolcats.blogspot.com/". Since this is part of a URL alphanumeric, underscore, and dashes will work.

Magic Submitter

Would you like to automatically create hotmail.com mail account?

OK **Cancel**
